Title: *Nicotinic Acid Compositions for Treating Hyperlipidemia and
Related Methods Therefor*

Box Issue Fee
Assistant Commissioner for Patents
Washington, D.C. 20231

COMMENTS ON STATEMENT OF
REASONS FOR ALLOWANCE

As the file history demonstrates, it is Applicant's position that Applicant has discovered unique methods for treating hyperlipidemia. The methods comprise administering to a hyperlipidemic an effective antihyperlipidemic amount of an oral nicotinic acid solid dosage form once per day, in the evening or at night.

Unlike the O'Neill et al., U.S. Patent No. 5,268,181, such unique methods, as claimed in claims 1-9 and 15-18, are accomplished without causing treatment limiting (i) hepatotoxicity, or (ii) without causing treatment limiting elevations in glucose and/or uric acid levels, or (iii) any combination thereof, in an appreciable number of subjects, irrespective of whether a hydrophobic

FAX RECEIVED
OCT 15 1999

component is mixed with the nicotinic acid prior to tablet or other product formulation. Thus, claims 1-9 and 15-18 are not limited to the requirement of adding a hydrophobic component for mixing with nicotinic acid prior to tablet formulation, as suggested by the Examiner in paragraph 1 of the Notice of Allowance mailed on July 7, 1999 in connection with the above-identified application for U.S. patent.

Respectfully Submitted,

Date: October 15, 1999
